Education

The Women University, Multan <i>Bachelor of Science in Computer Science</i>	Sep. 2022 – Sep. 2026 <i>Multan, Pakistan</i>
- Honhaar Merit-Based Scholarship recipient (Government of Pakistan) and college-level Merit Scholarship. - Final Year Project: SohanAgri, an AI-powered agricultural decision support platform supervised by Dr. Khadija Kanwal. - Relevant coursework: Data Structures and Algorithms, Database Systems, Software Engineering, Information Security, Artificial Intelligence.	

Experience

Optibyte Solutions <i>Web Developer</i>	Nov. 2024 – Jun. 2025 <i>Multan, Pakistan</i>
- Built and maintained client web applications in Laravel and MySQL, delivering authentication systems, role management, CRUD modules, and file upload pipelines. - Refactored frontend layouts using Bootstrap, improving responsiveness and reducing UI inconsistencies across device sizes. - Collaborated with designers to ship clean web interfaces; managed version control and team collaboration via Git and GitHub.	
BrookStone and Partners <i>Administrative Associate (Remote)</i>	Dec. 2025 – May 2026 <i>London, UK</i>
- Managed investor documentation, CRM records, and prospect research for fundraising mandates across UK, US, and MENA markets. - Coordinated cross-timezone workflows across London, Toronto, and New York offices to ensure timely delivery of investor-facing materials.	

Projects

SmileCare Dental Clinic <i>React, TypeScript, Tailwind CSS, Google Gemini API, Make.com, Vercel</i> <i>Live Production App</i> github.com/NoorayFatima/AI-Dental-Receptionist-Lead-Capture-System	- Built an AI receptionist that engages clinic visitors, captures appointment intent, and routes lead data to Google Sheets and Twilio WhatsApp in under 60 seconds. - Architected a three-layer pipeline: React frontend, Gemini conversational engine, and Make.com webhooks, removing backend overhead entirely. - Deployed as a live, end-to-end production system on Vercel, validated with real lead capture records.
SohanAgri <i>Flask, TensorFlow, Keras, PWA, gTTS, JavaScript</i> <i>Final Year Project, Supervised by Dr. Khadija Kanwal</i> github.com/NoorayFatima/Sohan-Agri-final	- Co-built a multilingual AI platform for South Punjab farmers with crop disease detection, pesticide dosage calculation, and live Mandi market prices in a mobile-first PWA. - Integrated a TensorFlow and Keras image classifier for real-time leaf disease detection with confidence scores and treatment recommendations from photo uploads. - Added Urdu and Punjabi support with RTL rendering and gTTS audio narration, making the platform accessible to users with low literacy or limited connectivity.
Folio <i>Next.js 15, TypeScript, Node.js, Express.js, MongoDB, JWT</i> <i>Full-Stack MERN</i> github.com/NoorayFatima/Folio-frontend	- Built a full-stack MERN knowledge vault with a Next.js 15 frontend and a decoupled Express API, secured with JWT authentication and protected research workflows. - Implemented real-time global search and dynamic tagging for instant content filtering without page reloads. - Designed a focused editorial UI with strong typography and slide-over patterns optimized for long-form technical note-taking.
Support Ticket System <i>Laravel 11, PHP, MySQL, Bootstrap 5, Blade</i> <i>Full-Stack Laravel</i> github.com/NoorayFatima/Support-Ticket-System	- Engineered a role-based support workflow in Laravel 11 with separate user and admin dashboards, middleware-protected routes, and session authentication. - Implemented a full ticket lifecycle (open, in progress, closed) with in-ticket threads, priority tagging, and an admin panel for ticket metrics and user activity.

- Applied Eloquent ORM relationships, input validation, and Blade templating to deliver a clean, maintainable MVC codebase.

Technical Skills

Languages: PHP, JavaScript, TypeScript, Python, HTML5, CSS3

Frontend: React, Next.js 15, Tailwind CSS, Bootstrap 5, Blade Templating

Backend: Laravel 11, Node.js, Express.js, Flask

Databases: MySQL, MongoDB

AI and Automation: Google Gemini API, TensorFlow, Keras, Make.com, gTTS

APIs and Auth: RESTful API Design, JWT Authentication, Webhook Integration

Tools and Platforms: Git, GitHub, Postman, VS Code, Vercel, WordPress

Practices: MVC Architecture, PWA Development, Responsive Design, Role-Based Access Control
